## ELECTRIC HEATING THAT IS TRULY SMART

Muller Group and Netatmo (French specialist of connected solutions) have joined forces to develop Muller Intuitiv with Netatmo, a smart solution for electric heating.

The Muller Intuitiv solution enables CAMPA electric heaters to adjust and personalize, room by room, your ideal comfort level. The module adapts to the entire 3.0 radiators and towel warmers ranges

This innovation was rewarded at the 2018 CES in Las Vegas.

SMART HOME

ECO DESIGN & SUSTAINABLE  
TECHNOLOGIES

## SMART HEATING

Smart self-learning heaters regulate the temperature automatically, increasing your comfort and lowering your energy consumption. Muller Intuitiv with Netatmo synchronizes heaters of a same room and analyses your home environment to plan heating times, so that it only turns on when needed.

## REMOTE CONTROL

Use the App to set the temperature from anywhere, at any time. Finish work early? Open the App and switch on the heating so that your home will be warm and cosy when you arrive.

## ADAPTATION AND INTUITIV LEARNING

Open-window ? Empty room ? Muller Intuitiv detects any unforeseen situation and informs the user who can make the required adjustment on his phone if needed.

Over time, Intuitiv® learns progressively about home insulation and lifestyle. It tracks down any source of waste and thus systematizes any potential savings by defining when to start heating to get the right temperature at the right moment.

Home Paris	
Living room	19.6°
MANUAL SETPOINT BT	
Kitchen	19.4°
Louise bedroom	19.9°
Parents bedroom	17.4°
Bathroom	21.2°
AT HOME	

## ENERGY CONSUMPTION MONITORING

Muller Intuitiv enables you to monitor your power consumption. On your smartphone, you can check the consumption of your electric radiators, per room, in kWh.

## VOICE CONTROL

Manage your heating by giving simple voice commands to your voice assistant. All you have to say is, "Set the temperature in the kitchen to 22°C", and your wish will be your voice assistant's command.

Works with  
Apple HomeKit

works with the  
Google Assistant

WORKS WITH  
amazon alexa

## INTEROPERABILITY

Thanks to Apple HomeKit compatibility, Muller Intuitiv with Netatmo solution enables you to create new scenes in the Home app from Apple, including your connected electric radiators and others Apple HomeKit compatible connected devices.

## EASY INSTALLATION

The plug-and-play installation couldn't be easier. Just insert the smart modules into your heaters and download the App.
